

# COVID OCCUPANCY THRESHOLD COUNTER

- ***Covid real-time occupancy data***
- ***Monitor count in lunchroom, reception or meeting area***
- ***No person to person interaction***
- ***Ability to monitor via standard web browser***
- ***Data is saved for up to 90 days***

**Camera runs:**

- Occupancy Analytic
- Database (Ins/Outs)
- Mounted at 11' can cover a 10' Entrance and/or Exit

**Occupancy Analytic:**

- Average Visit Time
- Average Occupancy
- Weather Impact on Occupancy

**ASUS Chromebit:**

- Pushes Interface To Monitor for Display
- Chromebit needs to be on same network as camera

***COVID Occupancy threshold counter, offers a cost-efficient way to accurately monitor your lunchroom, reception or meeting room area by providing an accurate count of individuals within the area in real-time.***

***Allows you to easily control and maintain your operation, in a safe and timely manner.***

## COVID visitor flow

**Monitor:**

- Displays Red or Green Symbol to inform customer to enter or wait

- *Provides real-time count/data on how many people are on your premises*
- *Allows you to measure if occupancy exceeds your set threshold during Covid.*
- *With COVID, and not wanting to exceed your max in an area, system can advise individuals NOT to enter.*
- *Can be integrated with existing cameras in your facility*
