This letter is to confirm MAXtech was awarded a surveillance system RFP by Hastings County for the installation of a cloud based security camera system. The project encompasses approximately 40 properties and 250 cameras. MAXtech is utilizing Verkada cameras and cloud storage to satisfy the requirements of the project.

MAXtech has provided Hastings County with excellent advice on both product technology and overall security of the properties. Installation and project management have exceeded expectations throughout the project. Hastings County very much appreciates the expertise that MAXtech brings to the table and will continue to utilize their services in the future.

Sincerely,

Larry Dean

Director of IT Services
