Reference for MaxTech Security Systems

I am writing this letter to recommend the services of Varien Solutions Inc. o/o MaxTech Security Systems. We started working with MaxTech in March of 2021 on a project to install a new security camera system at our main warehouse and corporate office location. We originally decided to partner with MaxTech, following initial introductions, as they were very responsive and professional in answering our questions and were knowledgeable in all aspects of the solution we required.

MaxTech provided a site survey with detailed drawings showing the number and locations of all cameras as required by our organization. Throughout the process they provided the technical information needed to help us make a final decision. The project involved the procurement of 144 cameras and all materials required for installation. The installation work commenced on June 3rd, 2021 and was completed, on schedule, on June 30, 2021. The on-site technicians were courteous and professional and the installation was completed with minimum disruptions.

As a result of the successful implementation at our main location, we were confident in expanding the security camera system to our branch network. There are now an additional 236 cameras installed at 35 of our branch locations with more branches to be scheduled in 2022.

Please feel free to contact me if you have any questions.

Regards,
